Types of Filter Cloth for AC Rooms to Improve IAQ

1. HDPE / PP / Nylon Filter Cloth
2. Anti-Microbial Filter Cloth
3. Catechin Impregnated Filter Cloth
4. Negative Ion Generating Filter Cloth
5. TiO₂ Impregnated Filter Cloth with UV Light
6. Anti Viral Filter Cloth
7. Composite Filter Cloth with Nano Fiber Fabric

Types of Filter Cloth for AC Rooms to Improve IAQ

1. HDPE / PP / Nylon Filter Cloth :

- Company has own weaving facilities of a capacity of 60 ton.
- We can Supply in Roll Form or in cut size as per the specification given by customers.
- Presently we are dealing in White / Black / Light Blue / Green / Brown colour.
- During the yarn extrusion we can modify the yarn with additive properties like : Catechin, TiO₂ etc
- Filter cloth suitable for PM 10 microns

6. Composite Filter Cloth with Nano Fiber Fabric :

- We can supply this composite Filter Cloth in two Combinations
 - a) With only Nano Fiber
 - b) With Nano Media + Activated Carbon Fabric
- To improve the IAQ with PM 0.3 microns, Odour's, cigarette smokes, Ozone and small quantity of H₂S and Formaldehyde
